RESULTS IN CONVERGENCE LATTICES

Your university experience is also shaped by the people you learn from and the work they continue to develop beyond the classroom.

Professor **Emilio Angulo**, our **faculty member in Mathematics**, recently delivered the keynote lecture **"Results in Convergence Lattices"** at the Meeting on **Interactions Between Topology, Algebra and Category Theory**, part of the **International Congress on Mathematics and Its Applications** held during the second week of September.

Dr. Angulo is **one of Mexico's few specialists in categorical topology**, a field that studies connections between **abstract mathematical structures and topological spaces**. Before joining Elisia Education Hub, he completed postdoctoral stays at **BUAP and New Jersey City University**, where he also taught undergraduate courses for two years.

Today, alongside his research, he teaches courses including **Calculus and Algebra**, giving you the opportunity to **learn from a professor who remains actively connected to international academic research**.

by ***Professor Emilio Angulo***

Advances Research in Thermal Barrier Coatings

Your university experience can also connect you with research that explores how materials can perform under some of the most demanding technological conditions.

Catalina Galeano-Camacho co-authored the research article "Analysis of the t′ + c Phase Content from ZrO_2-16 Mol.% Y_2O_3-16 Mol.% Ta_2O_5 Mechanoactivated Powder Mixtures in Coatings Deposited by Suspension Plasma Spraying," published in the Journal of Thermal Spray Technology.

The study focuses on **thermal barrier coatings**, materials used to **protect metallic components in gas turbines and power-generation engines** exposed to extremely high temperatures. Using suspension plasma spraying and specially prepared zirconia-based powders, the researchers achieved coatings with a high percentage of t′ + c phases and less than 5% porosity, providing a strong foundation for future work aimed at optimizing coating performance and spray parameters.

Research like this gives you a closer look at how **scientific knowledge can move from laboratory analysis toward applications in areas such as transportation, energy, and defense**.

by ***Catalina Galeano-Camacho***

Inteligencia Artificial: oportunidades para crear negocios y transformar el trabajo

La forma en que te prepares para trabajar, emprender o desarrollar nuevas ideas también depende de cómo aprendas a ***utilizar herramientas como la Inteligencia Artificial.***

En su columna para **Milenio, Virginia González-Cos Alcocer** explica cómo la **IA puede ayudar a identificar necesidades del consumidor, analizar mercados**, estudiar a la competencia, validar ideas de negocio, automatizar procesos y mejorar áreas como inventarios, atención al cliente, reclutamiento y planeación.

Más que sustituir por completo el trabajo, **la IA está transformando las tareas y aumentando la importancia de habilidades** como la adaptabilidad, el análisis, la colaboración, el pensamiento estratégico, la comunicación y el aprendizaje continuo. **El reto está en saber cuándo, cómo y para qué utilizarla**, considerando también la ética, la protección de datos, la transparencia y los sesgos algorítmicos.

La clave no está en adoptar tecnología por tendencia, sino en **utilizarla para resolver problemas reales y generar valor**.

by ***Virginia González-Cos Alcocer***

NO HACE FALTA QUE FALTE EL PETRÓLEO

Cuando entiendes cómo se forman las expectativas en los mercados, puedes ***analizar la economía más allá de lo que está ocurriendo en ese momento.***

En su columna publicada en **El Economista, la Dra. Nadyra Rodríguez Arias**, profesora de **Economía, explica por qué el precio del petróleo puede aumentar incluso antes de que exista una escasez real**. Ante riesgos geopolíticos o posibles interrupciones en el suministro, empresas e inversionistas ajustan sus decisiones con base en lo que esperan que pueda ocurrir.

El estrecho de Ormuz, por donde transita aproximadamente una quinta parte del petróleo comercializado a nivel mundial, ejemplifica cómo una amenaza puede modificar expectativas, aumentar la demanda anticipada, impulsar inventarios y contratos de futuros, y presionar los precios antes de que la oferta disminuya.

La idea central es clara: **los mercados no siempre reaccionan a lo que ya ocurrió, sino también a lo que creen que podría ocurrir**. Comprender esas expectativas te ayuda a **analizar cómo decisiones individuales pueden convertirse en efectos económicos a escala global.**

by ***Dra. Nadyra Rodríguez Arias***

Business Week 2026: Learn, Connect and Put Ideas Into Action

Your university experience can also give you opportunities to explore new interests, connect with professionals, and discover ideas that extend beyond the classroom.

From **September 21–24**, the **8th edition of Business Week** brought students together for four days of more than **20 conferences and workshops** focused on **business, innovation, marketing, leadership, and professional development**, with sessions led by Celia Martínez del Toro, Dr. Mario Durán Alcalá, Dr. Juan Manuel Camacho Pérez, Andrés Herrera, Andrea Zamudio, Dr. José Gabriel Fernández Arguello, Renato Villaseñor Mendoza, and many others.

Organized by students, for students, the event gave you the chance to learn directly from invited speakers, take part in practical activities, and gain **new perspectives on the professional world**.

Held in **A100 at Elisia Education Hub**, Business Week also created a space to connect with companies, professionals, and other students while discovering ideas and **skills you can carry into future academic, personal, and professional projects**.

FIRST DAYS IN CANTERBURY

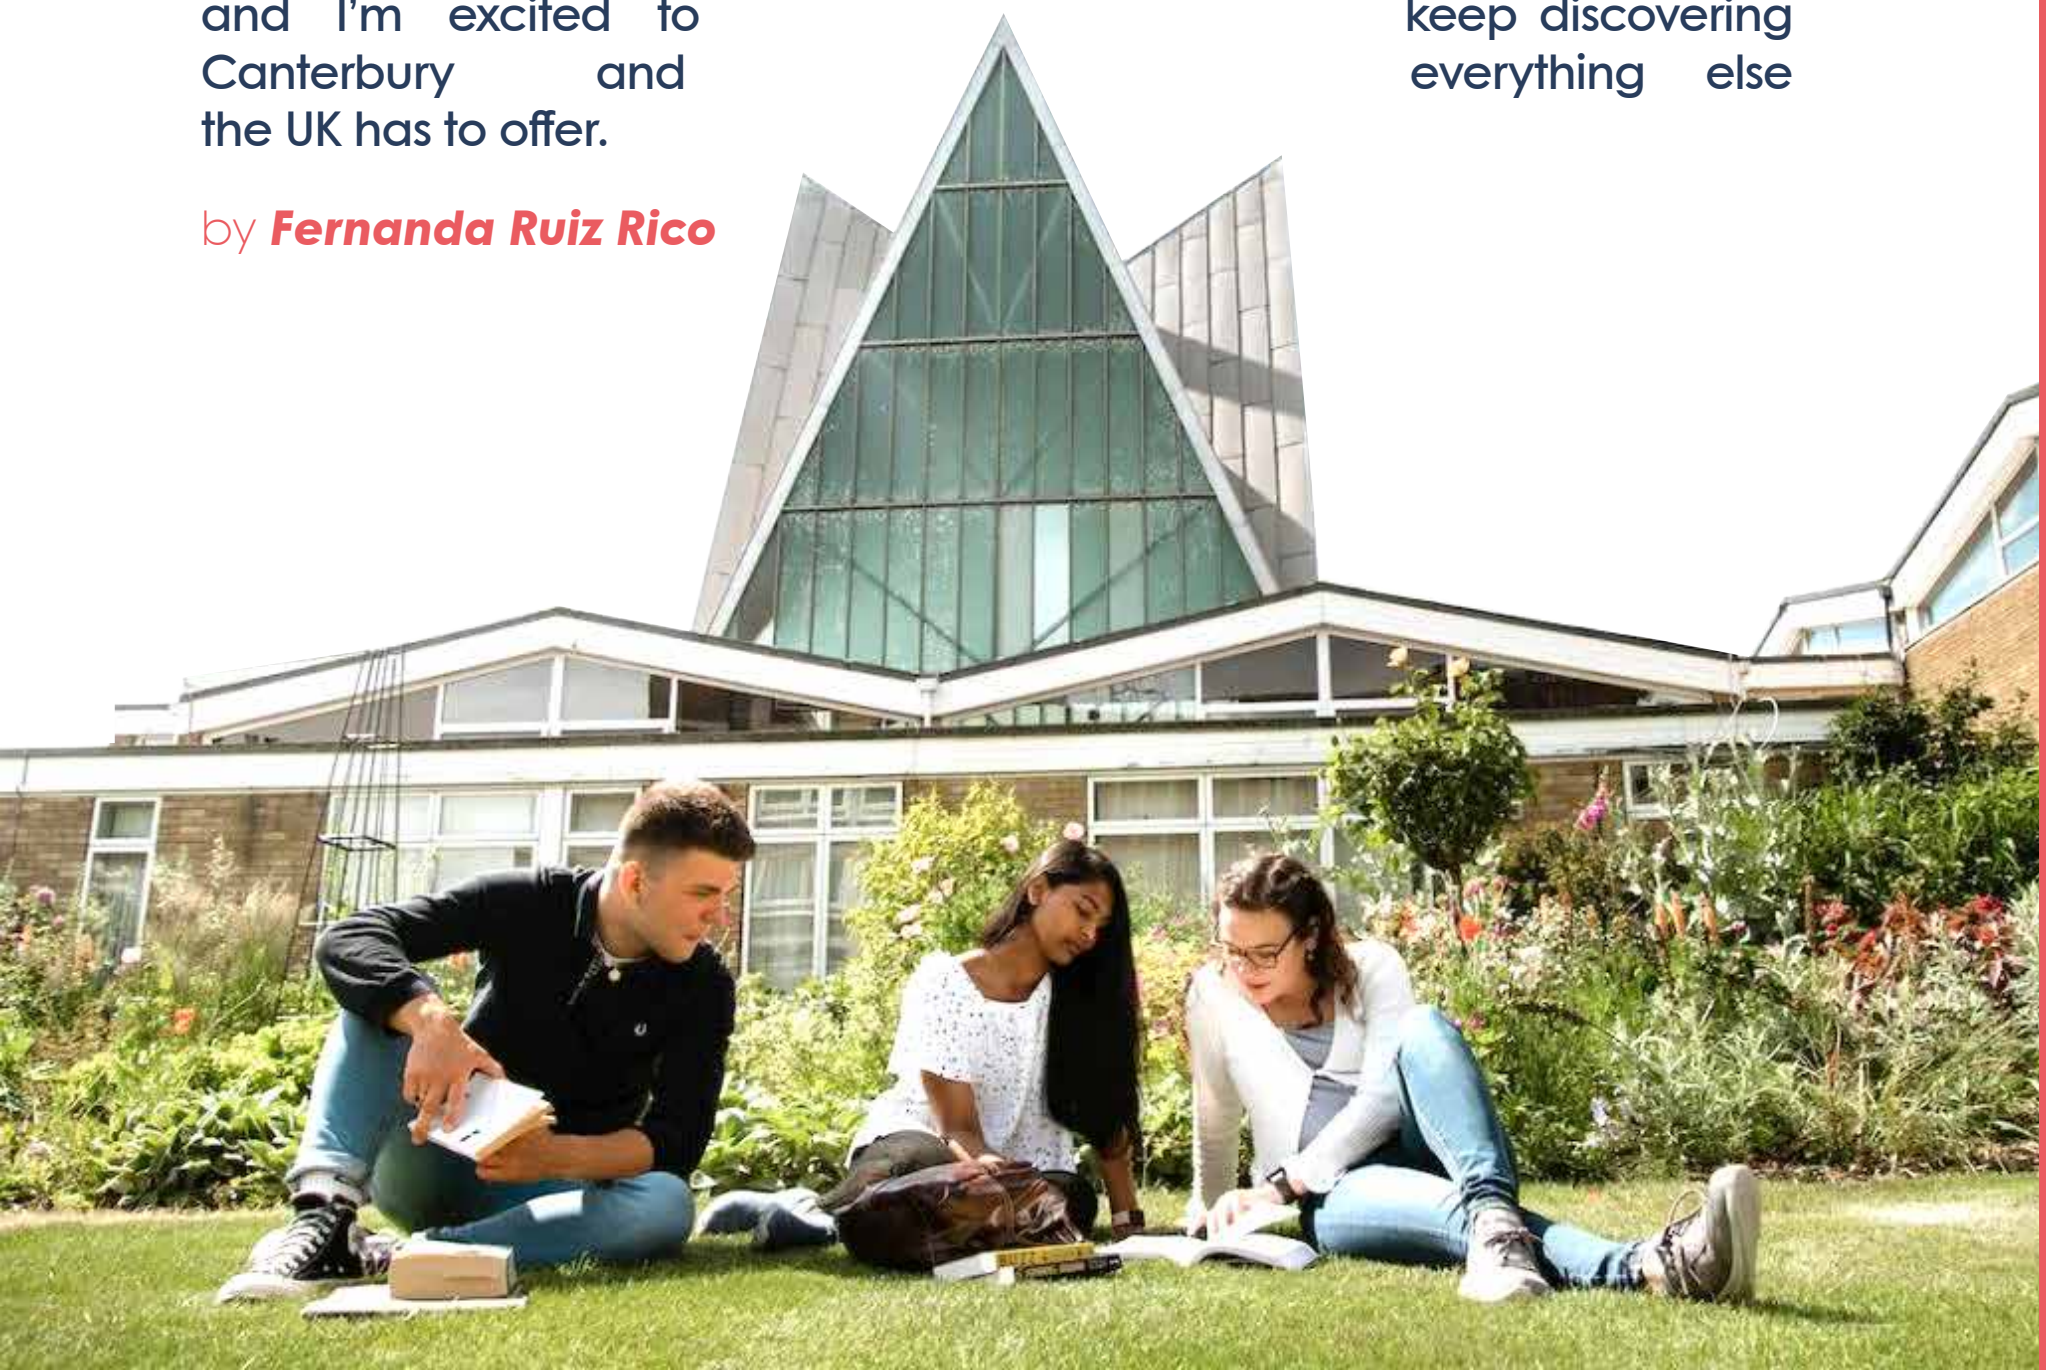

Your exchange experience can take shape through the small moments of living somewhere new, where everyday experiences can change your perspective.

My adventure officially began the moment I arrived in **England**. From navigating immigration and adapting to different British accents to taking the coach (long-distance bus) through **London toward Canterbury**, even the first few hours brought unexpected challenges and new experiences.

Canterbury quickly became one of my **favorite parts of the experience**. My accommodation is less than five minutes from the city centre, surrounded by historic places like **Canterbury Cathedral and St Augustine's Abbey**, while the university is only about a 10-minute walk away. The city feels almost like something out of a medieval fairy tale.

During CCCU's welcome week, activities like game nights, karaoke, films, pizza afternoons, and tea parties gave me the chance to **meet students from France, Germany, Spain, the United States, Japan, and beyond**. We are all experiencing something new together, which creates a real sense of connection. **My first week has been far better than I imagined**, and I'm excited to keep discovering Canterbury and everything else the UK has to offer.

by ***Fernanda Ruiz Rico***

Learning Across Cultures in Marseille

This semester, I am studying abroad at **KEDGE Business School in Marseille, France**, as part of my Business Administration studies. Arriving here has been exciting and a little overwhelming as I adapt to a different language, culture, and daily routine. What has surprised me most is **how welcoming people have been**, as well as the city itself — from the beaches and beautiful views to the incredible scenery from campus.

One of the most meaningful parts of the experience has been **meeting students from different countries and backgrounds**. Being in a classroom surrounded by people from around the world, sharing stories from our hometowns, and even being part of a group with mostly **German students and only three Mexicans** has given me new ways of seeing things and **helped me feel connected** even while being far from home.

As a Business Administration student, I am especially excited to learn how people from different cultures approach ideas and work together. This semester, I hope to improve my French, build new friendships, become more confident in unfamiliar situations, and learn how to handle pressure. I am still adapting, but having friends around me has made that process much easier.

by Jesus García Herrera

Finding My Rhythm in Sweden

My first weeks in **Sweden** have been a mix of small challenges, quiet moments, and constant discoveries. One of the first was figuring out the bus system when I arrived in **Kristianstad** and trying to understand a **Swedish ticket machine** before a patient driver helped me out. Even though almost everyone speaks English, adapting to the local rhythm and picking up **small Swedish phrases has been part of the experience from day one**.

At **Kristianstad University**, I was immediately struck by **how peaceful and green the campus feels**. My accommodation is only a short walk from class, and one of **my favorite discoveries has been fika** — taking time for coffee, a cinnamon bun, and conversation. It has become one of those small routines that makes everyday life here feel special.

What has made the exchange feel real is the **international student community**. During orientation week, we went from **being complete strangers to sharing stories from our home countries**, spending evenings together, and laughing about the things we were all still figuring out. Being far from home can be challenging, but going through the same transition with others makes it easier. Now, I'm **looking forward to exploring more of Sweden**, learning more of the language, and making the most of my semester at Kristianstad University.

by ***Joshua Roman Hernandez Leon***

Becoming More Independent in South Korea

When I first arrived in **South Korea**, I got a little lost at the airport, but what stood out most was **how willing people were to help**. Those first moments — from getting directions to finding the **Kukkiwon Taekwondo Museum**, which was especially meaningful to me because **taekwondo has been part of my life for many years** — helped me feel more comfortable in a completely new environment. **They also pushed me to become more independent and less afraid of asking questions**.

Exploring **Seoul** has given me many opportunities to experience **Korean culture and connect with people**. I have tried Korean BBQ, made new friends, learned more about the respect shown toward older adults, and **joined clubs at Dongguk University**, where I have **met students from Korea and other countries**. One of my favorite moments was having a conversation with an older woman on the subway even though we did not speak each other's language very well.

> **For the rest of the semester, I want to keep improving my Korean, make more Korean and international friends, and experience as much of student life as possible**. I am also interested in comparing university life and study habits here with my experience at Arkansas State University and discovering what I can apply to my own studies. I hope this **exchange helps me grow academically and personally** while becoming more confident and open-minded.

by ***Josue Nahum Velazquez Sanchez***

Fernanda, Jesus, Joshua, and Josue show how new cultures, friendships, and challenges can help you grow — and how an international experience can become part of your story too.

Your Career Can Start in More Than One Place

An internship, your first full-time role, a development program, or even a conversation that helps you understand where your skills could take you. Each one represents a different way to explore your interests, understand the professional world, and keep building the career you want to pursue.

SAFRAN	**Aeronautical Technician Training** - 2026 recruitment · Full-time training **GL Intern** - Accounting, Finance, Business or related fields **Procurement Systems Intern** - Engineering, Business, Computer Science or related fields **Internal Control Intern** - Accounting, Finance, Business, Engineering or related fields
HUAWEI	**Digital Power Engineer** - Fresh graduates 2025–2026 · El Marqués, Querétaro
MARTINREA	**Indirect Purchasing Intern** - Final-semester students · Advanced English
KIRCHHOFF AUTOMOTIVE	**Training Analyst** - On-site · Parque Industrial Querétaro
Microsoft	**SWE Intern** - Software Engineering internship
BRP	**Talent Acquisition Trainee** - Active undergraduate students · 12+ months before graduation
Pilgrim's México	**Global Talent Program** - Information sessions · Sept. 17
Deloitte.	**Exclusive Information Session** - 2026 graduates / soon-to-graduate students · Online
Schneider Electric	**GSC Development Program** - Online information session · Sept. 25

See an opportunity that fits where you want to go next and explore the full vacancy details here.

Tryouts: Your Talent Deserves the Chance

Your talent can become the starting point for your next university experience — but first, **you need the opportunity to show what you can bring.**

On **September 12**, nearly **70 prospects** took that step during the Tryouts, demonstrating their abilities in front of Athletics staff and coaches while discovering the academic programs, facilities, and student life that can be part of the **student-athlete experience**.

Whether your goal is to earn a place on a team, continue competing at the university level, or discover how far your sport can take you, **Tryouts give you the chance to step forward and find out what could come next.**

Mexican Fest: Celebrate, Connect and Make It Your Own

Being part of campus life also means finding moments where you can celebrate culture, connect with others, and create memories together.

On **September 9, Mexican Fest** brought the community together through music, dancing, games, and friendly competition. Students took part in activities such as Lotería, competed for prizes, and shared a festive afternoon with friends and classmates.

The celebration also included a **Norteño Dance Contest**, where the winners received an official university T-shirt. More than a single event, Mexican Fest gave you another chance to experience Mexican traditions, enjoy the community around you, and **make your university experience more memorable.**

More Than a Place to Live

Living in Residences gives you more ways to connect, try something new, and make your everyday university experience your own.

Throughout September, **Resident Assistants created activities around creativity**, wellness, technology, and community. Students explored **photography** during Shot on iPhone, designed rings, perfumes, and tote bags, shared a casual break over Build Your Own Pancake Skewer, and discovered **practical ways to use AI** in Correct Use of AI. Shatter the Past also created space for reflection and emotional well-being.

Creativity connected with a larger purpose through Colors of Nature, which supported the Ajolotario while students experimented with natural pigments. The month closes on September 30 with Caution in the Dating Game, an interactive activity focused on communication, boundaries, respect, and healthy relationships.

Whether you came to create, learn, recharge, or meet someone new, each activity gave you another way to make Residences feel like more than where you live — but part of your university experience.

Football Finds Its First Home Win

When you step onto the field, **preparation has the chance to become something real**.

The **Red Wolves** earned their first home victory of the **2026 Liga Mayor ONEFA season with** a 24-21 win over ULM, giving The Red Cave its first win of the season.

It is the kind of environment where every game gives you another chance to **compete, respond under pressure, and contribute to something bigger than one result**.

Basketball Starts Strong

Your season is built long before the first whistle — through every practice, every repetition, and every decision to keep improving.

The Red Wolves opened their 2026-27 ABE season with a 92-58 victory over Universidad Autónoma de Querétaro, putting that preparation into action in their first game of the season.

For a student-athlete, every game becomes another opportunity to grow with your teammates, compete at a higher level, and see what your work can become.

Rugby Takes the Podium

Competing against new opponents gives you the chance to discover how far your preparation can take you.

At the **2026 Pendergraft Tournament**, the **Bobcats TXST MEX women's rugby team earned first place, while the Red Wolves A-State men's team finished second** after facing teams from across the region.

For every **student-athlete** on the field, the podium represents more than a result. It is **another step in learning how to compete, adapt**, and keep moving forward.

October Gives You More Ways to Build Your Future

Your university experience can **keep expanding through sports, learning, culture, and community**.

The month begins with the energy of a **home Football Game Day on October 3**, before shifting into a week of ideas and problem-solving during **Engineering Week, October 12–16**. That same spirit of exploration continues on **October 17**, when prospective students experience the campus through the **Academic Excellence Open Day and Tryouts**.

Later, campus life opens another door through culture. On **October 23 at 10:00 a.m.**, the Great Hall will host the Ribbon Cutting and opening of an exhibition from **The Wittliff Collections at Texas State University**, giving you a different way to engage with creativity and ideas on campus. The following day, **Football Game Day** on **October 24** brings the community together once again around the **Red Wolves**.

As the month comes to a close, the focus turns toward well-being with **Mental Health Week, November 4–6**, creating **space to care for yourself** while continuing to make the most of your university experience.

Keep October on Track

Staying ahead of key academic dates helps you plan your time, make informed decisions, and **keep your semester moving in the direction you want**.

Keep these dates on your calendar:

October 1–7 — Midterm Examinations

October 2 — Last day of Session I classes

October 12 — Session II classes begin

October 15 — Second Meeting for Graduate Candidates

October 16 — Last day to make changes to the number of credits for financial responsibility for Session II courses

Whether you are preparing for midterms, beginning a new session, or getting closer to graduation, **knowing what is ahead gives you the opportunity to stay organized and make each academic decision with confidence**.

Experience Two Traditions, Two Ways of Celebrating

Late October and the first days of November give you the opportunity to ***experience two different traditions that bring people together***.

On **October 31, Halloween** brings costumes, decorations, themed activities, and a more playful side of the season. Then, on **November 1 and 2, Día de Muertos** invites you to experience one of Mexico's most meaningful traditions through ofrendas, cempasúchil flowers, candles, photographs, papel picado, and pan de muerto.

Experiencing both gives you the chance to **see how different traditions can shape the way people celebrate, remember, and connect with one another.** As you live and study in Mexico, these moments can help you understand the culture around you from a new perspective and make your university experience even more meaningful.

MAKE OCTOBER IN QUERÉTARO PART OF YOUR STORY

Living and studying in Querétaro gives you the chance to ***discover new places, share experiences with friends, and make the city part of your university life.***

This October, you can spend the day at **Festival Pulso GNP on October 10**, experience **Oktoberfest 2026 at Cervecería Hércules**, or plan a weekend in **Tequisquiapan for Festival Viva el Queso on October 17–18**.

If live music is more your style, **Romeo Santos and Prince Royce** arrive at Estadio Corregidora on **October 20**, followed by **Carín León on October 30**. You can also explore a different side of the city through **México Street Photo Fest '26**, running from **October 22 to November 22**, or close the month with **Ritual de la Uva at Viñedos Azteca** on **October 31**.

Whether you choose music, food, photography, or a weekend away from your routine, **each plan gives you another way to experience Querétaro** and make your time here your own.

Stay connected and join us for more stories, experiences, and opportunities in next month's edition.
